PROFILE SUMMARY

Aspiring graduate with a strong foundation in Data Analytics, Data Science, and Machine Learning. Skilled in Python, Java, and SQL, with hands-on experience engineering end-to-end ETL pipelines. Proven track record of leveraging Power BI, Machine Learning, and scalable databases to transform complex operational datasets into actionable business intelligence.

TECHNICAL SKILLS

Programming Languages: SQL, Python, Java

Data Analysis: Cleaning, EDA, ETL, Statistical Analysis, Hypothesis Testing

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn

Databases: MySQL, MongoDB

Tools: Excel (Pivot Tables, VLOOKUP, Power Query, Power Pivot, Macros), Google Sheets, Jupyter Notebook, VS Code

Python Libraries: Pandas, NumPy, Scikit-Learn

Machine Learning: Linear Regression, Logistic Regression, Decision Trees, Random Forest, KNN, SVM

Version Control: Git, GitHub

Core Concepts: Probability, Statistics, Data Wrangling, Model Evaluation

PROJECTS

AeroxDB — Airline Database Management System

GitHub (incl. dashboard): https://github.com/deveshdubey18/Aerodb_Database_Management | Tools: MySQL, SQL, Power BI, DAX

- Designed a fully normalized MySQL database for airline operations covering fleet management, crew assignments, bookings, and revenue analytics, with 9 interconnected tables and referential integrity enforced via foreign key and CHECK constraints.
- Built operational queries for fleet maintenance, crew compliance, and punctuality SLA monitoring; developed analytical dashboards for profit by currency and satisfaction by travel class — insights directly usable by airline ops teams to prioritize maintenance scheduling and route profitability decisions.
- Enforced data quality through ENUMs, foreign key constraints, and CHECK constraints across all tables, ensuring consistent and reliable outputs for downstream analytical use.
- *Gave airline operations teams a single source of truth for fleet and revenue metrics, supporting faster, evidence-based scheduling and route-profitability decisions.*

Supply Chain Management

GitHub (incl. dashboard): https://github.com/deveshdubey18/Supply_Chain_Management | Tools: Excel, Power BI, DAX

- Built an interactive Power BI Supply Chain Management Dashboard analyzing 22,150 warehouse records to monitor capacity, staffing, distribution, refill demand, storage, and operational issues.
- Performed data cleaning, transformation, and modeling using Power Query and DAX, creating KPI dashboards and interactive visualizations for warehouse and supply-chain performance analysis.
- Developed SWOT and Fishbone root-cause analyses to identify operational bottlenecks, supply-chain risks, and key drivers affecting warehouse network health.
- *Equipped warehouse managers with self-service KPI dashboards, reducing time spent compiling manual reports and speeding up operational decision-making.*

Candidate Selection Prediction Model

GitHub): https://github.com/deveshdubey18/Candidate_Selection_Prediction_Model | Tools: Python, Pandas, Scikit-learn, FLAML (AutoML), AutoGluon, Imbalanced-learn (SMOTE), Pickle

- Developed an end-to-end Candidate Selection Prediction Model using Random Forest, achieving 87.57% accuracy on a dataset of 50,000 candidate records.
- Implemented a complete ML pipeline including outlier treatment, missing-value imputation, one-hot encoding, feature scaling, SMOTE class balancing, and PCA dimensionality reduction.
- Applied K-Means clustering to segment candidates into 3 groups, alongside model evaluation using precision, recall, F1-score, and model serialization with Pickle.
- *Delivered a data-driven shortlisting tool that reduces manual resume screening effort for recruiters, enabling faster, more consistent candidate evaluation.*

INTERNSHIPS

Cloud Computing Intern – iFuture Technologies (July 2024)

- Completed a hands-on internship covering cloud computing fundamentals including service models (IaaS, PaaS, SaaS), virtualization, and cloud infrastructure management.
- Gained practical experience with VMware for virtualization setup and configuration.

EDUCATION

Bachelor of Science in Computer Science (B.Sc. CS) — University of Mumbai | Graduated: 2026 | CGPI: 8.68

Higher Secondary Certificate (HSC) — RJ College, Ghatkopar | Graduated: 2023 | 61.8%

CERTIFICATIONS

- Intermediate SQL Developer Certification | HackerRank | 2026
- Data Analytics Job Simulation | Forage | Deloitte Australia | June 2026
- Data Analytics Job Simulation | Forage | Quantium | June 2026

ACHIEVEMENTS

- Avishkar Research Presentation (19th Edition – December 2024)
