PROFILE SUMMARY

Aspiring Data Analyst and Computer Science graduate equipped with a strong foundation in Data Analytics. Skilled in Python, Java, and SQL, with hands-on experience engineering end-to-end ETL pipelines. Proven track record of leveraging Power BI, Machine Learning, and scalable databases to transform complex operational datasets into actionable business intelligence.

TECHNICAL SKILLS

- Programming Languages: Java, Python, SQL
- Python Libraries: Pandas, NumPy, Scikit-Learn, ImbLearn, Flaml
- Machine Learning: Linear Regression, Logistic Regression, Decision Trees, Random Forest, KNN, SVM
- Data Analysis: Cleaning, EDA, ETL, Statistical Analysis, Hypothesis Testing
- Data Visualization: Matplotlib, Seaborn, PowerBI, Tableau
- Databases: MySQL, MongoDB
- Version Control: Git, GitHub
- Tools: Jupyter Notebook, Google Colab, Google Sheets, Excel (Pivot Tables, VLOOKUP, Power Query, Power Pivot), VS Code, Android Studio
- Core Concepts: Probability, Statistics, Linear Algebra, Data Wrangling, Model Evaluation

PROJECTS

AerorDB — Airline Database Management System

Github: https://github.com/deveshdubey18/Aeror_DB_Database_Management

Tools/Technology: MySQL, SQL, Power BI , DAX

- Designed a fully normalized MySQL database for airline operations covering fleet management, crew assignments, bookings, and revenue analytics, with 9 interconnected tables and referential integrity enforced via foreign key and CHECK constraints.
- Built operational queries for fleet maintenance, crew compliance, and punctuality SLA monitoring; developed analytical dashboards for profit by currency and satisfaction by travel class — insights directly usable by airline ops teams to prioritize maintenance scheduling and route profitability decisions.
- Enforced data quality through ENUMs, foreign key constraints, and CHECK constraints across all tables, ensuring consistent and reliable outputs for downstream analytical use.

Supply Chain Management

Github: https://github.com/deveshdubey18/Supply_Chain_Management

Tools/Technology: Excel, Power BI, DAX

- Built an interactive Power BI Supply Chain Management Dashboard analyzing 22,150 warehouse records to monitor capacity, staffing, distribution, refill demand, storage, and operational issues.
- Performed data cleaning, transformation, and modeling using Power Query and DAX, creating KPI dashboards and interactive visualizations for warehouse and supply-chain performance analysis.
- Developed SWOT and Fishbone root-cause analyses to identify operational bottlenecks, supply-chain risks, and key drivers affecting warehouse network health.

Candidate Selection Prediction Model

Github: https://github.com/deveshdubey18/Candidate_Selection_Prediction_Model

Tools/Technology: Python, Pandas, Scikit-learn, FLAML (AutoML), AutoGluon, Imbalanced-learn (SMOTE), Pickle

- Developed an end-to-end Candidate Selection Prediction Model using Random Forest, achieving 87.57% accuracy on a dataset of 50,000 candidate records.
- Implemented a complete ML pipeline including outlier treatment, missing-value imputation, one-hot

- encoding, feature scaling, SMOTE class balancing, and PCA dimensionality reduction.
- Applied K-Means clustering to segment candidates into 3 groups, alongside model evaluation using precision, recall, F1-score, and model serialization with Pickle.

INTERNSHIPS

Cloud Computing Intern – iFuture Technologies (July 2024)

- Completed a hands-on internship covering cloud computing fundamentals including service models (IaaS, PaaS, SaaS), virtualization, and cloud infrastructure management.
- Gained practical experience with VMware for virtualization setup and configuration.

EDUCATION

Bachelor of Science in Computer Science (BSC.CS)

CGPI: 8.68

University of Mumbai

Higher Secondary Certificate (HSC)

61.8%

RJ College, Ghatkopar

CERTIFICATIONS & ACHIEVEMENTS

- Intermediate SQL Developer Certification | HackerRank | 2026
- Data Analytics Job Simulation | Forage | Deloitte Australia | June, 2026
- Data Analytics Job Simulation | Forage | Quantum | June, 2026
- Avishkar Research Presentation (19th Edition – December 2024)
